Ship Tracker FAQ

Tracker Plus · tankers and cargo ships at sea, live

In one line: a live sea map. Red ships are tankers, green ships are cargo ships. You need a free key (one time, 3 minutes) to see real ships.

The chart (sample ships)

First screen

What am I looking at?

A map of the sea. Each small ship shape is a real ship (once your key is added), pointing the way it sails. The bottom of the screen counts the tankers and cargo ships you can see.

How do I set it up? (one time)

1. Open Ships. The first screen shows a QR code.
2. Scan it with your phone (on the same Wi-Fi).
3. Follow the steps on the phone page: sign in to **aisstream.io** (free), make a key and paste it in.
4. Ships starts by itself. The key is saved on the unit for good.

Can I look first?

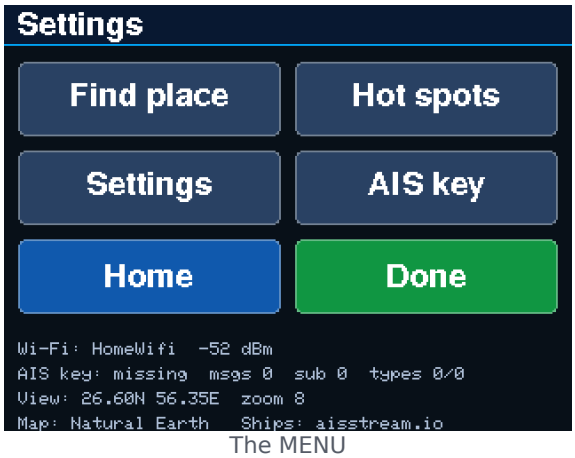

Yes. Tap **Demo** on the first screen. You see sample ships on the Strait of Hormuz, with no key needed. Later tap MENU > AIS key to set up your real key.

What do - and + do?

They zoom the map out and in. The buttons are on the right side of the map.

How do I go somewhere else?

Tap **MENU**, then **Find place** or **Hot spots**, and pick a port or strait.

The MENU

Why are the dots grey?

A ship's type arrives about every 6 minutes. New ships show as grey dots and turn red or green after a few minutes. This is normal. Give it 5 to 10 minutes.

Why is the sea empty?

Ships near coasts show best. In the middle of an ocean there may be none in view. Try MENU > Hot spots to go where ships are busy.

Is the key free? Do I pay each month?

Free. Nothing to pay. The key is yours, from aisstream.io.

What if I type the key wrong?

Tap MENU > AIS key and do it again.

Where does the map come from?

The land and sea picture is from Natural Earth. Ship positions are from aisstream.io.

Need more help?

Open the full Tracker Plus guide from Settings > Help & info (scan the QR code), or contact the seller and tell them the version in Settings > Help & info.
