Quick Start

Tracker Plus · start here · version 1.4, build 130

Welcome! Four steps and you are on air. You need your own **2.4 GHz Wi-Fi** (most home routers have it) and a USB power cable.

Step 1 · Plug it in

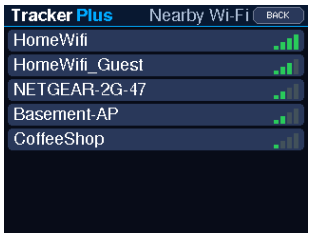

Plug the USB cable into the unit and any phone charger. The screen lights up.

Step 2 · Touch the dots

Four dots appear: top left, top right, the middle, then the bottom. Press the middle of each one with your fingertip, then lift.

Press each dot

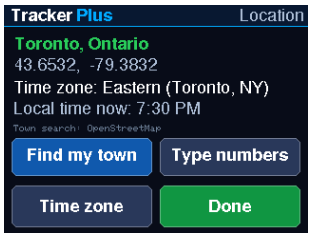

Tap your Wi-Fi name

Step 3 · Join your Wi-Fi

Tap **SCAN**, tap your Wi-Fi name, type the password, tap **OK**.

Step 4 · Set your town

Tap **Settings**, then **Location**, and type your town.

Type your town

Home: tap any tile

Now try it

- Tap **Internet Radio** for music. It sounds like a little AM radio, with decent quality.
- Tap **Aircraft** to see planes flying near you.
- Tap **Ships**, then **Demo**, to see ships. (Real ships need a free key. The unit shows you how.)

Need help? On the unit tap Settings > Help & info and scan the QR code. It opens

Aircraft, ships, news, weather and other live data come from free third-party services. Their availability, speed and accuracy can change at any time, so live data features cannot be guaranteed.
